

# Brookfield Sustainability Charrette

**FEBRUARY 22 - 27**

**3 LOWER JARVIS STREET**

School of Design, Toronto, Ontario

## 2023 INTERNATIONAL CHARRETTE INFORMATION

The charrette will focus on the theme of **Smart Sustainability** which grows from the intersection of wisdom and innovation and the application of digital transformation to help meet sustainable development goals. The projects have been selected to cover areas such as city planning, architecture and interior design, urban agriculture and heritage conservation and revitalization.

The interdisciplinary teams will be working on actual projects that will then be developed into working prototypes after the charrette engaging with community groups, the College, developers, and corporate clients. Students from Schools in Europe and North America will collaborate on developing proposals for the projects that are already in research and development stages.

### PROJECTS THAT WILL BE WORKED ON

Short Food Supply Chain Project  
Linear City Project  
Wooler Area Community  
Organization Project  
Climate Positive Housing Development  
Chalk River Interpretative Centre
